### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, with respect to independent claim 1, none of the prior art alone or in combination disclose or teach of an imaging lens system comprising an aperture stop, a positive first lens, a meniscus second lens and a biaspheric third lens as claimed, specifically wherein at least one biaspheric lens satisfies the condition regarding the thickness of the biaspheric lens.

Specifically, with respect to independent claim 8, none of the prior art alone or in combination disclose or teach of an imaging lens comprising an aperture stop, a positive biconvex first lens, a negative meniscus second lens and a positive meniscus third lens in order from an object side as claimed, specifically wherein the third lens is a biaspheric lens and satisfies the condition regarding the Abbe numbers of all three lenses.

Specifically, with respect to independent claim 9, none of the prior art alone or in combination disclose or teach of an imaging lens comprising an aperture stop, a positive first lens, a positive meniscus second lens and a negative meniscus third lens in order from an object side as claimed, specifically wherein the third lens is a biaspheric lens and satisfies the condition:  $v_3 < 45$ .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### CONCLUSION

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kurihara (U.S. 4,606,607) is being cited herein to show an imaging lens comprising some of the structural limitations of that of the claimed invention, but does not specifically disclose the third biaspheric lens as claimed.
